🪪 PROFILE

Highly motivated and detail-oriented Angular frontend developer with 3 years of experience at Infosys, specializing in building scalable and responsive web and mobile applications. Seeking a challenging role where I can leverage my expertise in JavaScript frameworks, user-centric design, and performance optimization to contribute to innovative digital solutions and grow as a key member of a dynamic development team.

🎓 EDUCATION

Bachelor Of Technology, *J*awaharal Nehru technological University, Anantapur. CGPA : 6.92

2016 – 2019
Kurnool

🧠 SKILLS

Programming Language:
JavaScript, TypeScript, SQL

Tech-Stack:
Angularjs, Angular 18 &14, Html5, Css3,Nodejs, Rest API's, ASP.NET Core, Azure, Postman, jira, git, github, Android Studio, angular cloud, Jasmine for unit testing.

💼 PROFESSIONAL EXPERIENCE

Senior System Engineer, *Infosys Ltd*

27/06/2022 – 2 2 / 07/2025
Hyderabad, India

- Played a significant role in the development of "Lex," a comprehensive educational application built with AngularJS.
- Designed and implemented user interfaces, ensuring a seamless and intuitive user experience.
- Integrated various modules and functionalities, enhancing the application's core features.
- Developed secure and responsive front-end components using AngularJS to meet complex banking requirements.
- Collaborated closely with the Dubai-based client team to gather requirements and deliver tailor-made solutions.
- Ensured adherence to strict security protocols and data privacy standards relevant to the financial sector.
- Led the complete API migration for the existing banking application to a new API system, ensuring minimal downtime and seamless transition.
- Designed and implemented new dynamic banner functionalities across the application, improving user engagement and communication.
- Successfully managed the integration of new APIs, conducting thorough testing to ensure data integrity and functionality.
- Developed and customized responsive user interfaces using Angular Material components, including dynamic lists with sorting, filtering, and pagination to enhance usability and performance.

Certification: Angular (infosys internal certification)

📁 PROJECTS

09/2024 - 07/2025

Dubai client Based Mobile Banking App, *Rakbank mobile App*

- Led front-end development for RAKBANK's mobile Banking, delivering high-performance banking solutions to customers.
- Spearheaded the migration of legacy APIs to Optimizely APIs, enhancing data efficiency and reducing load times by 40%.

- Developed and maintained Angular-based features**, ensuring compliance with banking security standards and responsive design.
- Collaborated with back-end teams to integrate JWT-based authentication and optimize API consumption for transactional modules.
- Implemented state management(NgRx) to streamline data flow across the application, improving scalability.
- Conducted performance tuning using Chrome DevTools , achieving a 15% improvement in page load speed.
- Tech Stack: **Angular 18**, NgRx (State Management), Optimizely APIs, JWT Authentication, SCSS, PrimeNG, Docker (for deployment), Agile/Scrum methodology, Rxjs, Jasmine karma.

ETA (Education, Training and Assessment).,   12/2022 – 07/2024
LEX App (Infosys internal education App and website).

- Developed and enhanced features for the Infosys LEX platform (web and mobile app) using Angular, improving user experience for over 300K+ employees.
- Collaborated with cross-functional teams to implement responsive UI components, ensuring seamless functionality across devices.
- Maintained and optimized the training session scheduling module, enabling global administrators to add, modify, or remove sessions dynamically.
- Integrated RESTful APIs with Angular services for real-time data rendering and improved application performance.
- Conducted code reviews and debugging to ensure adherence to best practices and reduce front-end latency.
- Assisted in UI/UX improvements by implementing Angular Material and custom components for a consistent design system
- Tech Stack: **Angular 14**, TypeScript, RxJS, Angular Material, REST APIs, HTML5, CSS3, Jasmine for unit testing, Git for version control.

Emirates HealthCare Portal | 07/2022 – 11/2022

- Designed and developed a responsive healthcare management portal using Angular and ASP.NET Core web API for robust client-server system.
- Implemented Material data tables with sorting, filtering, and pagination to manage patient records efficiently.
- Developed custom Material dashboards with cards, progress indicators, and charts for real-time health analytics.
- Integrated REST APIs using ASP.NET core to fetch and update appointment data,ensuring seamless interaction between patients and doctors.
- Tech Stack: Angular 12, ASP.NET core Angular Material, RxJS, REST APIs, SCSS, Agile Methodology.

  - ➢ Collaborated effectively with cross-functional teams and clients to resolve complex UI/UX challenges, ensuring timely delivery of secure and scalable solutions.

  Exposure to AI-driven Tools:

  - ➢ Explored integration of AI-driven components and automation tools to enhance user experience and streamline data workflows across web and mobile platforms
